# WIZ HYBRID VAPORIZER

## An unheard-of feeling!

Inspired by the very best from the vaping universe, revolutionized by the Hybrid chip and designed to stand out while fitting your lifestyle perfectly. The Wiz Hybrid Vaporizer combines two types of vaping: aromatic herbs vaping and e-liquid vaping. This combination creates an entirely new way of vaping both e-liquid and aromatic herbs.

The Hybrid chip enables the simultaneous use of two types of vaping. It has made it

possible to create a 2 in 1 vaping device. In addition to allowing the combination of both types of vaping, thus making it possible to switch from one type to the other, the Hybrid chip also makes it possible to vape aromatic herbs and e-liquid simultaneously. Whatever you choose, you are sure to be amazed.

What are the advantages of using the Wiz Hybrid Vaporizer? Combining both types of vaping will result in a nice, dense

*Ceramic tank, can contain 0.5g of aromatic plants*

**wiz**  
HYBRID VAPORIZER

*Tank that can contain 2ml of e-cigarette liquid*

vapor thanks to the vaping of e-liquid. Combining both types of vaping also makes it possible to add your favorite e-liquid flavor to your CBD flower, or to add the flavor of a CBD flower to your e-liquid... the possibilities become almost limitless. However, the main advantage of this type of vaping is that when you vape CBD flower together with e-liquid, the effect of the CBD, or any other type of flower or herb, is doubled. E-liquid vapor can indeed be inhaled more easily

and in larger quantities. The flower and e-liquid vapors are going to combine, and the effects of this vapor will be felt more strongly. Simultaneous vaping will make you rediscover your favorite flowers. There is one inconvenient to vaping aromatic herbs, namely that only little vapor is produced. CBD flower, as well as any other type of aromatic herb, contains very little moisture so that its vaping can only produce very light vapor, which can frustrate vapers who used to smoke.

**1 Fire button:** This button allows to switch from one mode to another in only three clicks, as well as to start vaping the e-liquid. It also changes colors to display the remaining battery runtime.

**2 + and - buttons:** These buttons allow setting the heating temperature for vaping aromatic herbs.

**3 ON/OFF switch:** This button allows to easily and intuitively switch your Wiz Hybrid Vaporizer on and off in order to offer a safe and pleasant use.

**4 USB port:** The USB type-C port allows an ultra-fast charging of the batteries, straight through the device, without any damage.

The Wiz Hybrid Vaporizer uses a hybrid vaping system, i.e., with both convection and conduction. Its airflows, located above the ceramic tank, allow the air to enter and to come into contact with the heating point of the device.

The Wiz Hybrid Vaporizer works with interchangeable batteries so as to offer the best possible vapor and battery runtime. The batteries are connected in series so that the voltages add up and offer appropriate runtime and power for your use. Thanks to the USB Type-C port, you'll be able to recharge your batteries immediately by simply connecting your Wiz to an appropriate USB port. A second valve has been added to the battery valve in order to make opening and closing it easier.

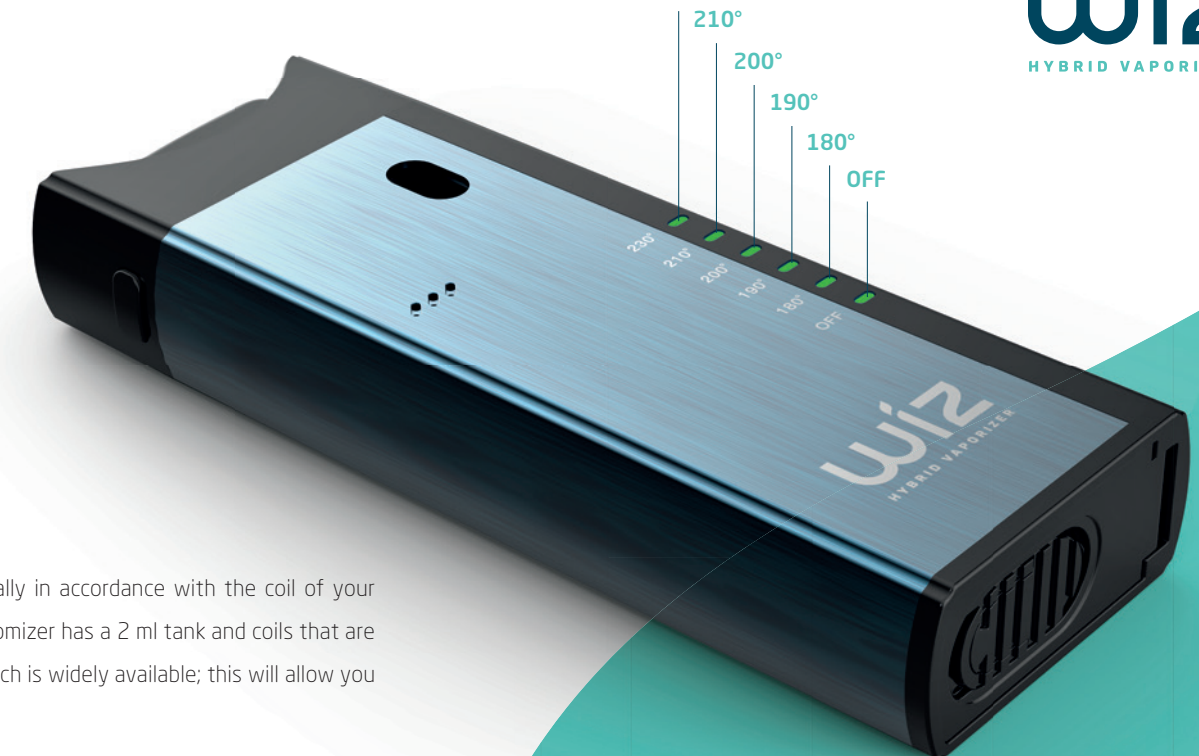

*Vaping aromatic herbs is done by combined heating of conduction and convection so as to provide the best possible sensation and vaping.*

The layout of the buttons has been designed to be as simple and intuitive as possible. The Wiz Hybrid Vaporizer has 3 buttons and an ON/OFF switch.

The pre-setting of the temperature allows you to adapt the temperature for dry-herbs vaping.

These are the 5 temperatures that can be selected: 230°

The vaping of e-liquid is regulated automatically in accordance with the coil of your atomizer and the level of the batteries. The atomizer has a 2 ml tank and coils that are compatible with the "Nautilus Aspire" type, which is widely available; this will allow you to find appropriate coils anywhere.

The Wiz Hybrid Vaporizer pack contains a large number of tools and accessories that will allow you to use the device optimally.

The content has been designed for an optimal use of the device.

**wiz**  
HYBRID VAPORIZER

### 1 The grinder

The grinder included in the Wiz Hybrid Vaporizer pack allows you to grind your aromatic herb and optimize the vaping and its effects.

### 2 The spoon

It allows to press your aromatic herbs tightly into the ceramic tank.

### 3 The tweezers

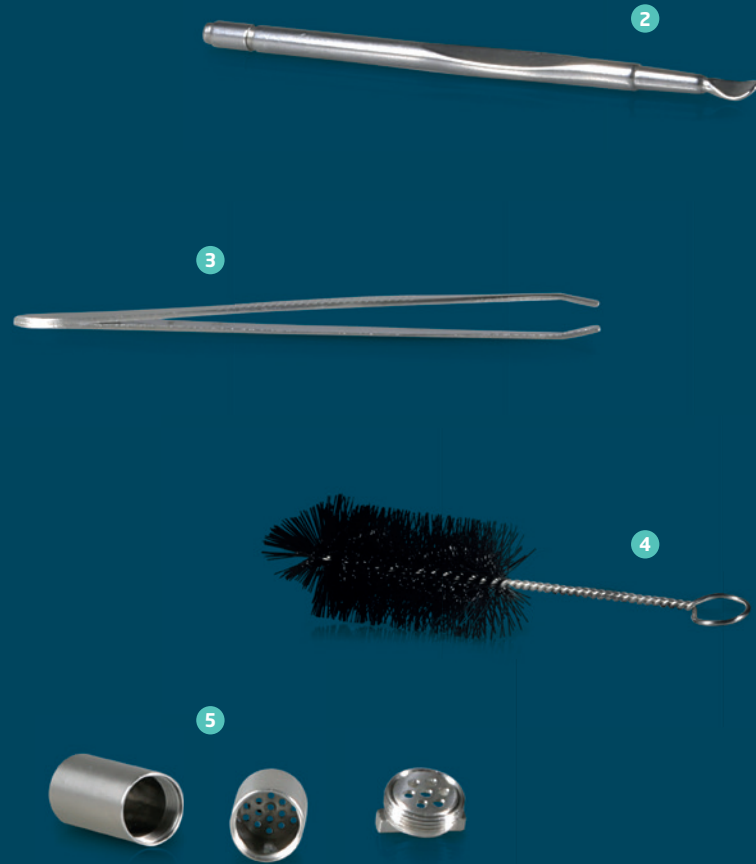

Very handy to get hold of bits that are stuck in your tank.

### 4 The brush

This brush is made of a special material to ensure that your tank doesn't get damaged during cleaning.

### 5 The metal tank

This metal tank allows vaping pollen, resin, wax and any other type of product without damaging your ceramic tank because of the heating of the device.

# WIZ ONE

## A portable vaporizer that transports you with delight

The Wiz One was the very first myGeeko vaporizer. Small, compact and very easy to use. This vaporizer was designed to allow new vapers to familiarize themselves with vaping with a pleasant and intuitive model. The curved design of the Wiz One makes it very pleasant to hold it in your hand.

The Wiz One contains a ceramic tank with a holding capacity of about 0.7g and is heated by convection, which means that the tank is immediately heated and that your herb, which is in direct contact with the tank, is heated more rapidly. Its digital OLED screen allows the

temperature to be set precisely. You can choose to display the temperature either in Celsius or Fahrenheit degrees. The temperature range goes from 100°C to 260°C (or 212°F to 500°F) and you can thus vape any type of aromatic herb.

To switch from one type of display to the other, press and hold the main button, which is located between the **+** and **-** buttons.

wiz  
ONE

Main button

+ Button

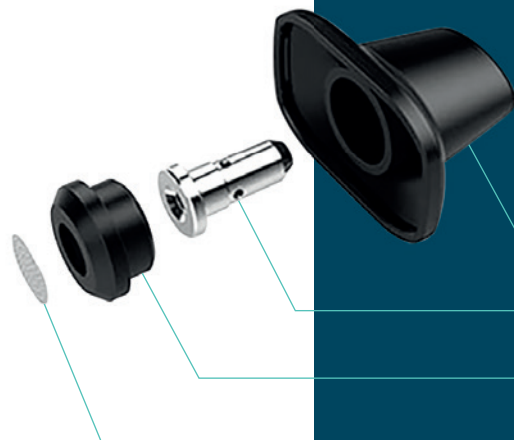

- Button

- The  button (the one on the right): This button allows to increase the temperature
- The  button (the one on the left): This button allows to decrease the temperature
- The ON/OFF button (the one in the middle): This button allows to switch the device on and off as well as to switch between the Celsius and Fahrenheit degrees modes.

The mouthpiece has been especially designed for oral comfort and to enable a better inhaling of the vapor produced by the heating of your aromatic herb.

The vaporizer doesn't require external batteries. It can be recharged through the micro-USB port at the bottom of the device. With a 1700 mAH battery, the Wiz One offers a very adequate runtime.

**Mouthpiece**

**Airway**

**Silicone**

**Filter**

The electronic chip contains a safety mechanism that switches off the device after a few minutes of use in order to avoid overheating the herb or damaging the device. In addition to this internal safety, it is also possible to switch the vaporizer on and off with the button located between the  and  buttons.

The Wiz One pack is very comprehensive so as to offer optimal use to all buyers of this model. This pack contains:

- The spoon: it is used to press your aromatic herbs tightly into the ceramic tank.

- The tweezers: these are very handy to get hold of bits that are stuck in your tank

- The brush: This brush is made of a special material to ensure that your tank doesn't get damaged during cleaning.

- The metal tank: this small metal tank allows vaping pollen, resin, wax and any other type of product without damaging your ceramic tank because of the heating of the device.

- The cotton swabs: These cotton swabs have been specifically designed for an in-depth cleaning of the ceramic tank.

- The filters: These filters prevent tiny bits of herbs from passing through the mouthpiece into your mouth (please also refer to the detailed picture of the mouthpiece to see how it works).

# THE KUSH RANGE

In the times of ancient Greece and Egypt, our ancestors had methods for vaping and extracting aromatic and medicinal herbs. For centuries, these various methods were passed on from one generation to another, allowing mankind to enjoy the benefits of nature.

However, science and technological progress slowly erased these extraction types from our production processes, replacing them with less natural ingredients and methods until we almost forgot that Antiquity was already quite advanced in terms of extraction and vaping.

For several years, we searched for the most natural way to extract the essence from hemp and cannabis in order to offer vapers a real alternative to combustion and smoke. During our research, we found an ancestral method of extracting through vapor, in a 100% natural manner. By mixing this extract with glycol propylene and vegetal glycine, we get an e-liquid that is 100% natural and provides the real scent of hemp.

After several years of trials and research, myGeeko is now proud to present its range of e-liquids Kush. The very first range of e-liquids with 100% naturally extracted hemp aroma.

## MYGEEKO KUSH

MyGeeko Kush is the very first e\_liquid to use the ancestral method of vapor-extracting hemp. Contrary to other CBD liquids, myGeeko Kush is not composed of terpenes or artificial aromas. MyGeeko Kush is composed of the hemp's natural extraction, which makes it possible to enjoy its true flavor. No other e-liquid on the market has been able to offer the flavor of the hemp to the same degree as myGeeko Kush.

Thanks to an extraction method that was finetuned and mastered for years, we managed to create the first e-liquid with the real taste of cannabis, with

no addition of CBD, THC or nicotine. Rediscover the true flavor of cannabis thanks to this e-liquid. Produced naturally, without adding any chemical agent, terpene or CBD. This forms the basis of the Kush range.

Each hemp flower was carefully selected. The dried flowers are sourced from CBD hemp, warranting a THC percentage lower than 0.2%.

In order to provide this unique flavor, myGeeko Kush products require large quantities of CBD dried herbs and a very long preparation time.

AVAILABLE IN  
100MG, 300MG  
AND 500MG

## AMNESIA HAZE

This exceptional e-liquid has been created from cannabis flowers through an ancestral extraction method. myGeeko managed to extract the flower's full flavor into this e-liquid, which is specially designed for electronic cigarettes. From now on, vapers from all over the world will be able to discover the true flavor of our Amnesia Haze and true smokers will have an alternative that provides the same taste and sensations.

In order to offer you a real feeling of well-being thanks to the CBD, we use pure CBD crystal to ensure that the effects of the CBD will be felt perfectly. This way, true smokers can enjoy our e-liquid as a true alternative.

AVAILABLE IN  
100MG, 300MG  
AND 500MG

## BUBBLE KUSH

The sweet scent of earth and pine, which makes this variety so special, is felt even better in this e-liquid. In order to emphasize the scent of Bubble Kush, myGeeko used all its know-how to extract the terpene of the Bubble Kush. The terpene that was added to the extract of the herb itself will allow vapers to detect the subtleties of this memorable scent.

This extraction process is a world exclusive, available only at myGeeko's. In order to offer you a real feeling of well-being thanks to the CBD, we added pure

CBD crystal to the CBD already present in the plant. This method allows to select the CBD dose more precisely, which allows each vaper to choose the dose that suits him best.

The Bubble Kush is in direct lineage of the famous Bubba Kush. However, the origins of Bubble Kush don't stop there. Bubble Kush is a hybrid of the very famous OG Kush and the Bubble Gum. With such ancestors, the Bubble Kush can only be exceptional. Less strong and more refined than the Bubba Kush, the Bubble Kush is a variety whose use offers real pleasure.

AVAILABLE IN  
100MG, 300MG  
AND 500MG

## LEMON HAZE

The Lemon Haze variety requires no introduction. Popularized in the years 2000, this variety is a crossbreed of the very famous Super Skunk and Super Silver Haze. Its lemon and citrus scents distinguish it from any other cannabis variety available on the market. The Lemon Haze is a must in the Haze family.

Its citrus and lemon scent, which made this variety so special, is even better felt in this e-liquid. In order to emphasize the flavor of the Lemon Haze, myGeeko

applied its expertise to extract the terpene from the Lemon Haze. The terpene that was added to the extract of the herb itself will allow vapers to detect the subtleties of this memorable scent.

AVAILABLE IN  
100MG, 300MG  
AND 500MG

## PURPLE HAZE

When speaking about cannabis, one variety always gets mentioned. It is, of course, the Purple Haze, named after the very famous Jimi Hendrix song Purple Haze. Created in the 60's in Amsterdam, The Purple Haze is one of the most

popular varieties in the world. With a sweet and tropical flavor, the Purple Haze has many enthusiasts all over the world.

Its sweet and soft flavor, which made this variety so popular, is felt even better in this e-liquid. In order to emphasize the flavor of the Purple Haze, myGeeko applied its expertise to extract the terpene from the Purple Haze. The terpene that was added to the extract of the herb itself will allow vapers to detect the subtleties of this memorable scent.

AVAILABLE IN  
100MG, 300MG  
AND 500MG

## MASTER KUSH

Master Kush is the mother of all Kush varieties. Discovered in the Afghani mountains of Hindu Kush, Master Kush is the variety that brought about all Kush varieties which we know today (OG Kush, Strawberry Kush, Candy Kush ...). A true precursor of cannabis, Master Kush is the reference in terms of cannabis. Sweet and with a light flavor of lemon, Master Kush is perfect for vapers looking for a sweet, non-aggressive vape.

AVAILABLE  
IN 1000MG

## BOOSTER CBD

myGeeko's CBD booster is used to add CBD to your e-liquid. Thanks to this booster, you'll be able to prepare your e-liquids and add the CBD dose that best fits your needs.

In order to offer a superior quality, the CBD of this booster is extracted in the same manner as for the Kush range. This ancestral method allows to extract the plant's molecules in full and warrants the preservation of the benefits of the CBD molecule.

Packaged in dropper bottles in order to allow you to measure out the exact dose you need.

It is advisable not to mix CBD e-liquid with your nicotine e-liquids. Nicotine being a stimulant and CBD a relaxant, the opposite effects of both molecules would "cancel" each other. In order to best enjoy the CBD, it's best not to vape with a wattage superior to 15 Watts.

This booster is available in 1000mg (10%).

# THE CLASSIC MYGEEKO E-LIQUID RANGE

## Every flavor. Every scent. Every style.

Many people use aromatic and medicinal herbs for their health benefits, without enjoying their scent. This is why myGeeko has developed a range of e-liquids that can very well be mixed with various aromatic herbs, in order to allow such users to enjoy and discover herbs vaping in another light.

Each flavor has been well thought and dosed so that both flavors combine without one of them altering the other. Many possibilities thus open up. Thanks to the Wiz Hybrid Vaporizer, you can thus vape this herb together with your e-liquid. The mixing of both types of vaping allows you to discover the aroma of your herb in an entirely new way.

## PUNK PINK

Punk Pink is a delicious blend of wild and red berries. This very sweet e-liquid combines very well with various sweet herbs. If you are vaping hemp, varieties such as Strawberry Kush will combine perfectly with Punk Pink.

## PITAYA

Discover this sumptuous e-liquid with flavors of Asian fruits. The Pitaya is an e-liquid based on dragon fruits. This e-liquid will make you travel to the marvelous sceneries that Asia has to offer. Combines perfectly with various Asian herbs such as Valerian.

## SUNSET

The Sunset is the perfect e-liquid to feel like you're on holiday. This delicious blend of mango and ananas will make you feel like you're on the beach, under a palm tree. Its sweet flavor will emphasize the fruity aspect of your herbs. The Sunset combines very well with herbs such as Mango Kush.

## ORANGE CRUSH

This flavor is a subtle blend of biscuit and oranges, with just a whiff of spiced gingerbread. Worthy of the best candy shops, Orange Crush is the perfect e-liquid for gourmets. Ideal for Orange Bud lovers, Orange Crush will emphasize your herb's orange scent while adding a very pleasant flavor of biscuit.

## KARPUZ

MyGeeko's new Karpuz has the flavor of watermelon. This sweet and soft e-liquid takes after the delicious, widely known, Mediterranean watermelon. Its sweet and soft side allows to soften your aromatic herb and adds a taste of freshness.

AVAILABLE IN  
0, 3, 6 AND 12MG

## PINKIE

The Pinkie sees the world through rose-colored glasses. A perfectly dosed dream; a unique blend of red berries handpicked to make you travel to a sweet, sweet world. Its aftertaste of Bubble Gum makes the Pinkie even better and makes it possible to combine it with herbs such as Bubble Kush or to soften herbs with a strong flavor such as Purple Haze.

AVAILABLE IN  
0, 3, 6 AND 12MG

## APPLE JUICE

The Apple Juice is an apple-flavored e-liquid. Its subtle flavor of red apples makes this e-liquid the ultimate apple juice. It perfectly renders the effects of a real fresh apple juice. Try it; you will love it. Aromatic herbs such as lavender or other hemp varieties such as the Jamaican Dream are perfect for a successful flavor mix.

AVAILABLE IN  
0, 3, 6 AND 12MG

## LIMONETA

The Limoneta is a unique e-liquid whose flavor stems from a lemonade recipe. Its flavors of sorbet and slightly acid lemon immediately transport your tastebuds into a dream in which you are sipping a lemonade cocktail. Lemon- or citrus-flavored herbs such as the Lemon Haze, Amnesia Haze or even Ringo's Gift will see their flavor enhanced thanks to the Limoneta.

AVAILABLE IN  
0, 3, 6 AND 12MG

## SIBERIA

The Siberia is well-named: icy mint livened up with a zest of lemon to enhance the slightly sweet taste of the mint crystals. For an immediate refreshment! The Siberia is perfect for people seeking a breeze of freshness during vaping.

## HELLO SUNSHINE

Hello Sunshine is your mornings' ray of sunshine: a subtle and refined flavor of strawberry softened by sweet and generous kiwi fruit. This beautiful e-liquid will be the ray of sunshine that transforms rain into a rainbow of flavors. The Hello Sunshine being a relatively sweet and refined flavor, it is often combined with herbs such as Candy Kush or Banana Kush.

## AMERICANO

The Americano is an e-liquid with flavors of mild American tobacco. You'll be surprised by its complex flavors and perfect dosage of mild US tobacco, smelling of grilled chestnuts, and Equatorial Cocoa. All this character doesn't in any way lessen the "hit", which remains quite strong even with a nicotine dosage of 3mg. Ideal to emphasize the flavor of the tobacco, for those wishing to vape tobacco herbs.

## MILKSHAKE

Sweet and creamy, the MilkShake is the perfect vanilla milkshake. Its creamy and tasty flavor will bring joy to your palate. Of course, a tasty flavor requires a sophisticated blend of flavors. The MilkShake is an e-liquid that will make your vaping session unforgettable. The vanilla flavor being particularly dominant, a touch of cream has been added to soften the mix and the aroma has been dosed so as to not alter the herb.

## COLUMBIANA

The Columbiana is a Colombian coffee enriched with a grain of Mocha coffee. It's the strongest, most pronounced taste of the whole range. Ideal for those wishing to vape an aromatic plant with a rather dominant flavor. The Columbiana will rapidly get the upper hand on the herb's aroma.

## CARAMEL 'CRUSH'

Caramel Crush is a blend of caramel and salted butter. This flavor provides a perfect combination of sweet and salty. It has been designed for people who want to vape herbs that are strong in taste, such as White Widow, AK47 or Gelato. Pleasant and sweet, this e-liquid will give an entirely new flavor dimension to your herbs.

## RED DEVILS BLACK GEEKO

Black Geeko is an e-liquid with a flavor of strong dark tobacco. This dark tobacco e-liquid, arrived straight from Hell, will be ideal for smokers of dark tobacco and unfiltered cigarettes. Its slightly woody flavor brings a new dimension to an herb that is mixed with Black Geeko. We often advise combining Black Geeko with varieties such as Super Skunk or the Critical.

# THE MYGEEKO AROMAS

## Into infinity and further!

Thanks to DIY, there will no longer be any limit to your mixes of flavors from aromatic herbs and e-liquids. Natural aromas, which combine perfectly with one another or with aromatic herbs. An infinite universe opens up. Endless possibilities.

Prepare your cocktail of aromas, add nicotine or CBD, dilute with a base of PG/VG and your e-liquid is ready for use. The DIY allows to enrich the flavors of your aromatic herbs. Discover or rediscover your favorite herbs in an unprecedented way.

An entire range designed to make you experience vaping and flavors in a way that no other aromatic herbs vaporizer ever has.

## RED STAR

This blend of wild berries, blackcurrant and mint will bring Red Astair to mind, with an added ingredient known only to myGeeko. Thanks to this new recipe, myGeeko will help you discover the famous red e-liquid in another dimension.

## APPLE

More than a mere apple flavor, Apple is a blend of several apples, designed to offer a unique and natural apple flavor.

## BERRY

Wild berries lovers, this is the aroma for you. A blend of several fruits, this aroma will make you taste wild berries in a new way. This aroma combines perfectly with myGeeko's aromas Raspberry, Strawberry, Peach or Exotic Fruit.

## BLUE STAR

Fans of the Heisenberg, myGeeko has created the Blue Star aroma for you. With its blend of fruits and fresh mint, myGeeko's Blue Star will offer you a rich flavor that is both fresh and fruity.

## BLOND TOBACCO

Classical mild tobacco, this Blond Tobacco by myGeeko is an ideal aroma for those in search of a soft mild tobacco flavor. Very neutral, this aroma will combine perfectly with gourmet aromas such as Speculoos or Caramel.

## BROWN TOBACCO

Do you miss the flavor of dark tobacco? Then our Brown Tobacco is the one for you. Produced from real tobacco plants from France, myGeeko's Brown Tobacco will remind you of the strong and spicy flavor of a dark tobacco worthy of its name.

## BUBBLE GUM

Can't find the Bubble Gum flavor you are looking for? myGeeko has concocted the ultimate Bubble Gum for you. Do you want to add flavor to your Bubble Gum? Add a touch of fruity aroma and sweetness will invite itself into your vape.

## COCONUT

Coconut and exotic fruits lovers, myGeeko's Coconut is the one for you. Just like the other myGeeko aromas, the Coconut is made of natural aromas in order the most realistic coconut flavor, with no chemical after taste.

### COKE

As its name suggests, the Coke aroma is a cola flavor. Using only natural flavors in order to offer the cola flavor without chemical aftertaste. Inspired by the recipes of the most famous brands, myGeeko's Coke is the most natural aroma and the most similar to the original cola.

### EUCALYPTUS

Sweet and tasty, myGeeko's Eucalyptus is perfect for lovers of light citrus flavors. Eucalyptus blends perfectly with our Fresh Mint, Mojito or Lemon and will offer you unique and pleasant flavors.

### EXOTIC FRUIT

One of the first e-liquid flavors ever created, Exotic Fruit remains unequalled. This aroma will provide you with sensations that are rarely matched. If you wish to make this flavor a bit more complex, mix it up with any of the fruity aromas from our DIY range.

### FRESH MINT

Fresh Mint is the perfect aroma for those who love fresh, mentholated flavors. Blends very well with fruity flavors or with tobacco aromas, for people who enjoy menthol cigarettes. The refreshing sensation is perfect for those who wish a strong hit without using a high dosage of nicotine.

### GREEN TEA

Worthy of the best green teas on the market, this aroma combines sweetness and complexity. If you'd like to enjoy the flavor of a mint tea worthy of the best Moroccan tea rooms, myGeeko advises you to mix our Green Tea with Spearmint.

### LEMON

Straight and to the point, myGeeko's Lemon aroma can be mixed with several flavors from our range such as the Mojito, Eucalyptus or FreshMint. MyGeeko's Lemon uses natural flavors, just as all other aromas of the myGeeko range.

### MANGO

MyGeeko's Mango is an aroma that brings out the mango flavor even better than any other aroma. Based on natural aromas, this mango aroma will make you feel like you're biting into the real fruit, in India.

### MOJITO

Do you feel like the summer is dragging its feet? Our Mojito aroma will make you feel it's summer all year through. Its blend of lime, green mint, sugar cane and rum will make you discover all aspects of this cocktail.

## PEACH

Juicy and unique, myGeeko's Peach uses natural peach aroma. This sweet and soft flavor provides the pleasant and unique flavor of the peach. This aroma combines perfectly with our various fruity aromas.

## PINEAPPLE

This famous exotic fruit is available as a myGeeko aroma. The Pineapple invites itself into your vape, to your greatest enjoyment. Ideal in cocktails with our Passion Fruit or Strawberry, the Pineapple will make you experience a pineapple flavor like rarely before.

## RASPBERRY

One of the most famous aromas in the DIY universe, myGeeko's Raspberry is a natural raspberry flavor. MyGeeko's Raspberry mixes very well with the Strawberry aroma and other fruits and will make you enjoy the Raspberry flavor perfectly.

## SPEARMINT

MyGeeko's Spearmint is a green mint aroma. This flavor perfectly renders the green mint flavor thanks to the natural aromas which were used to conceive it. You can create a mint tea flavor by mixing our Spearmint with the myGeeko GreenTea.

## SPECULOOS

This Belgian ginger biscuit, which is famous all over the world, can be discovered or rediscovered through vaping. Thanks to this aroma, Belgian will invite itself into your vape as well as your palate. The Speculoos blends perfectly with the tobacco aromas and provides a sweet and savory flavor.

## STRAWBERRY

A sweet, natural, strawberry aroma. A great classic among the DIY aromas, our Strawberry combines perfectly with other aromas, making it possible to create unique flavor cocktails.

## STRAWBERRY CANDY

You are hesitating between a fruity taste and one that combines tastiness and sweetness? Then our Strawberry Candy is the one for you. This strawberry candy flavor offers an original, fruity flavor.

## SWEET TOBACCO

A neutral, blond tobacco, mixed with a soft and sweet aroma. MyGeeko's Sweet Tobacco provides the feeling of a savory tobacco. Mix the Sweet Tobacco with our Speculoos flavor to obtain a unique sensation.

## PASSION FRUIT

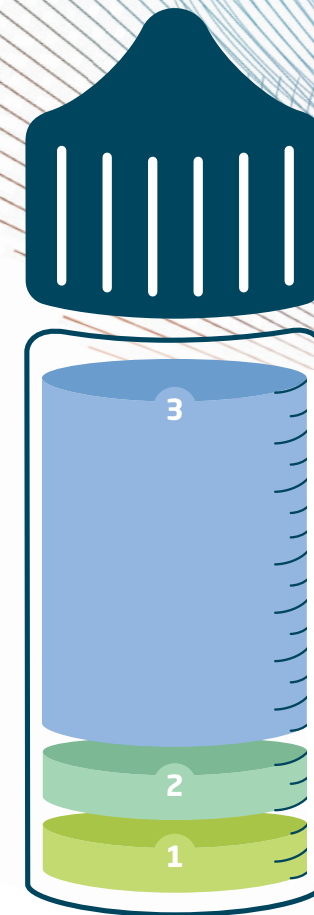

Sweet and soft, myGeeko's Passion Fruit perfectly renders the taste and feeling of the passion fruit. It combines perfectly with our various fruity aromas and will make you experience the flavor of exotic fruits like no other aroma before.

## MELON

Straight and to the point, myGeeko's Melon is an excellent aroma for the lovers of fruity flavors. Sweet and soft, our Melon perfectly renders the flavor of the fruit. Available in the myGeeko brand, the Melon flavor uses natural aromas to bring you the real taste of melon.

# IT'S YOUR TURN!

Enjoy a multitude of possibilities thanks to the myGeeko aromas. Create your own flavors, your cocktails, your aroma dosage, your nicotine dosage, your CBD dosage, your composition exactly as you wish to have it. Thanks to myGeeko and the DIY, discover an infinite universe with a multitude of possibilities!
